There are a lot of opportunities in what is called “Patient Access,” and refer to positions that involve duties such as referrals, authorizations for care, eligibility, scheduling, financial counseling, which are functions that happen before or during the time of healthcare services. Those currently in or graduated from NPC’s program in “Medical Office Administration” are a great fit for these jobs. Even if you are still pursuing the “Medical Office Administration” certificate or degree, some of these positions are still available for you and are a great opportunity to start getting experience.
